Intelligent Data Acquisition and
Advanced Computing Systems:
Technology and Applications
(IDAACS)
Volume 2**

IDAACS'2019

The crossing point of Intelligent Data Acquisition & Advanced Computing Systems and East & West Scientists

September 18-21, 2019
Metz, France

ORGANIZED BY

IEEE Ukraine Section I&M / CI Joint Societies Chapter
Research Institute for Intelligent Computer Systems
Ternopil National Economic University and
V.M. Glushkov Institute of Cybernetics, National Academy for Sciences of Ukraine
ENIM (Ecole Nationale d'Ingénieurs de Metz)
LCOMS (Laboratory of Conception, Optimisation and Modelling of Systems)
University of Lorraine

SPONSORED BY

Metz, is a city in northeast France located at the confluence of the Moselle and the Seille rivers. Metz is the prefecture of the Moselle department and the seat of the parliament of the Grand Est region. Located near the tripoint along the junction of France, Germany, and Luxembourg, the city forms a central place of the European Greater Region and the SaarLorLux euroregion.

The French national census of 2012 estimated the population of Metz to be

119,551, while the population of Metz urban agglomeration was about 389,851.

Metz has a rich 3,000-year-history, having variously been a Celtic oppidum, an important Gallo-Roman city, the Merovingian capital of Austrasia, the birthplace of the Carolingian dynasty, a cradle of the Gregorian chant, and one of the oldest republics in Europe.

The city possesses one of the largest Urban Conservation Areas in France, and more than 100 of the city's buildings are classified on the Monument Historique list. Because of its historical and cultural background, Metz is designated as French Town of Art and History, and has been submitted on to France's UNESCO World Heritage Tentative List.

Metz is the economic heart of the Lorraine region, specialising in information technology and automotive industries. Metz is home to the University of Lorraine, Georgia Tech Lorraine, and a centre for applied research and development in the materials sector, notably in metallurgy and metallography.

Message from the IDAACS 2019 Co-Chairmen

It's our pleasure to welcome all attendees the 2019 IEEE 10th International Conference on Intelligent Data Acquisition and Advanced Computing Systems: Technology and Applications (IDAACS), www.idaacs.net, which will be held in Metz, France, 18-21 September, 2019.

The main goal of IDAACS'2019 is to provide a forum for high-quality reports on the state-of-the-art Theory, Technology and Applications of Intelligent Data Acquisition and Advanced Computer Systems as used in different areas. A family of IDAACS Workshops has already been created since the IEEE 1st IDAACS Workshop was held in Foros, Crimea, Ukraine, July 1-4, 2001. After that the following IDAACS Conferences were held in Lviv, Ukraine, 2003, Sofia, Bulgaria, 2005, Dortmund, Germany, 2007, Rende (Cosenza), Italy, 2009, Prague, Czech Republic, 2011, Berlin, Germany, 2013, Warsaw, Poland, 2015, Bucharest, Romania, 2017. Moreover, IDAACS Symposia on Wireless Systems (SWS) were held in Offenburg, Germany in 2012, 2014, 2016 as well as in Lviv, Ukraine in 2018.

The IDAACS 2019 Conference is organized by IEEE Ukraine Section I&M / CI Joint Societies Chapter and the Research Institute for Intelligent Computer Systems, Ternopil National Economic University (TNEU) and V.M. Glushkov Institute of Cybernetics, National Academy of Sciences, Ukraine in cooperation with the ENIM (Ecole Nationale d'Ingénieurs de Metz) and LCOMS (Laboratory of Conception, Optimisation and Modelling of Systems) of University of Lorraine, France.

It is supported and sponsored by IEEE Ukraine Section, IEEE France Section, MDPI Sensors, Fondation ENIM, Metz Metropole, River Publishers, so we express our sincere gratitude to each of them.

The International Program Committee of IDAACS'2019 is co-chaired by Francesca Guerriero, Italy and Carsten Wolff, Germany, many thanks to both of them. In addition, we express our gratitude for all members of IPC. There were submitted the 314 papers by authors from the 42 countries. Many thanks to all the reviewers, their names are listed in the proceedings and their contribution to the quality and success of this Conference. After the reviewing process, the 213 papers were accepted for a publication in the Conference proceedings. All the presentations are organized into the 27 oral and the 3 poster sessions. In addition, three prominent experts are invited to deliver keynotes during plenary sessions: Jürgen Sieck, University of Applied Sciences, Berlin, Germany; Kurosh Madani, Paris-Est Créteil Val-de-Marne University, France; and Fabio Scotti, University of Milan, Italy. We appreciate their contribution to the IDAACS 2019 Conference very much.

Besides, the IDAACS 2019 remained its peculiarity providing seven special streams, and Workshops on Cyber Physical Systems and Internet of Things with 11 sessions.

Metz is the economic heart of the Lorraine region, it's home to the University of Lorraine. The university has over 60000 students, close to 6900 staff members, among which 3700 faculty and searchers, 43 teaching departments, 60 research centers, and several campuses in the entire region. Several important universities are mentioned such as the Pole Universitaire Européen de Nancy Metz, Georgia Tech Lorraine, Ecole Nationale d'Ingénieurs de Metz (ENIM). The city economy relies on the sectors of commerce, tourism, information technology, and the metallurgical and automotive industries. The city is a center for applied research and development in the materials sector, notably in metallurgy and metallography.

Lastly, we would like to thank all our friends and colleagues from the previous IDAACS' conferences as well as new participants coming in Metz to discuss the latest achievements in the fields of Intelligent Data Acquisition and Advanced Computer Systems!

Enjoy attending the IDAACS'19 conference and the charm city of Metz!

Table of Contents

Volume 1

Approach to Managing Data from Diverse Sources. <i>Vitalii I. Yesin, Mikolaj Karpinski, Maryna V. Yesina, Vladyslav V. Vilihura, Olga Veselska, Lukasz Wieclaw</i>	1
Comparative Analysis of Key Encapsulation Mechanisms. <i>Maryna Yesina, Mikolaj Karpinski, Volodymyr Ponomar, Yuriy Gorbenko, Tomasz Gancarczyk, Uliana Iatsykovska</i>	7
A Method for Decimal Number Recovery from its Residues Based on the Addition of the Product Modules. <i>Mikolaj Karpinski, Stanislaw Rajba, Stanislaw Zawislak, Kornel Warwas, Mykhailo Kasianchuk, Stepan Ivasiev, Igor Yakymenko</i>	13
Indoor Emergency Evacuation Model Based on Artificial Bee Colony Algorithm. <i>Xinlu Zong, Jiayuan Du, Wei Liu, Lu Zhang, Qian Huang</i>	18
The Development of Distance Learning in Ukrainian Liberal Arts Institutions Based on EU Experience. <i>Halina Falfushynska, Aleksandra Klos-Witkowska, Bogdan Buyak, Grigory Tereshchuk, Uliana Iatsykovska, Pawel Falat, Rafal Szklarczyk</i>	24
Accuracy Enhancement of a Blind Image Steganalysis Approach Using Dynamic Learning Rate-Based CNN on GPUs. <i>Eslam M. Mustafa, Mohamed A. Elshafey, Mohamed M. Fouad</i>	28
The Extended Generalized Neo-Fuzzy Network and its Online Learning in Image Recognition Problem. <i>Nonna Kulishova, Yevgeniy Bodyanskiy, Iryna Pliss</i>	34
Enhancing the Performance of an Image Steganalysis Approach Using Variable Batch Size-Based CNN on GPUs. <i>Eslam M. Mustafa, Mohamed M. Fouad, Mohamed A. Elshafey</i>	40
Chaotic Map Synchronization by Common-Mode Truncation Pulses for Secure Communications. <i>John Kalomiros, Stavros G. Stavriniades</i>	45
Low Cost Outdoors WSN Parking System for Metropolitan Areas Based on RSS. <i>Mauricio Postigo-Málaga, Luis Porras Figueroa, José Chilo</i>	50
Modeling of Cognitive Evolution. <i>Vladimir G. Red'ko</i>	54
Data Piecewise Linear Approximation for Bearings Degradation Monitoring. <i>Fei Huang, Alexandre Sava, Kondo H. Adjallah, Zhouhang Wang</i>	60

The Application of the Internal Restructuring Method of the Information Resource Data According to the Sign of the Number of Series of Units to Improve the Statistical Coding Efficiency. <i>Vladimir Barannik, Ivan Tupitsya, Valeriy Barannik, Sergii Shulgin, Alexander Musienko, Roman Kochan, Olga Veselska</i>	65
A Spark-based Distributed Whale Optimization Algorithm for Feature Selection. <i>Hongwei Chen, Zhou Hu, Lin Han, Qiao Hou, Zhiwei Ye, Jiansen Yuan, Jun Zeng</i>	70
Distributed Text Feature Selection Based on Bat Algorithm Optimization. <i>Hongwei Chen, Qiao Hou, Lin Han, Zhou Hu, Zhiwei Ye, Jun Zeng, Jiansen Yuan</i>	75
A Feature Selection Method of Parallel Grey Wolf Optimization Algorithm Based on Spark. <i>Hongwei Chen, Lin Han, Zhou Hu, Qiao Hou, Zhiwei Ye, Jun Zeng, Jiansen Yuan</i>	81
Recurrent Random Delay Estimation in Networked Discrete Control Systems. <i>Leonid Lyubchyk, Galina Grinberg, Olha Dunaievskya, Nataliia Protsai</i>	86
Control and Identification in Cognitive Maps with Suppressing Constrained External and Internal Disturbances in Impulse Processes. <i>Vyacheslav Gubarev, Viktor Romanenko, Yurii Miliavskiy</i>	90
Data Processing in IoT for Smart City Systems. <i>Oleksij Duda, Volodymyr Kochan, Natalija Kunanets, Oleksandr Matsiuk, Volodymyr Pasichnyk, Anatolij Sachenko, Taras Pytlenko</i>	96
Study of the Functioning of the Distributed Computer System with a Resource Control Mechanism Based on a Network-Centric Approach. <i>Vadym Mukhin, Viktor Vyshnivskiy, Yaroslav Kornaga, Oksana Herasymenko, Yuriy Bazaka, Maxim Bazaliy</i>	100
A Wireless Sensor Network Location Algorithm Based on Whale Algorithm. <i>Fenghao Lang, Jun Su, ZhiWei Ye, XiaoXiao Shi, Feng Chen</i>	106
Multi-hop Routing Implementation in Spatially Distributed Wireless Sensor Networks for Large-Scale Environmental Monitoring Applications. <i>Afzal Ahmad, Muhammad Adeel Pasha, Shahid Masud, Manuel Schappacher, Assila Belhouichet, Axel Sikora</i>	111
Cyber Resilience Approach Based on Traffic Engineering Fast ReRoute with Policing. <i>Oleksandr Lemeshko, Oleksandra Yeremenko, Maryna Yevdokymenko, Anastasiia Shapovalova, Ahmad M. Hailan, Amal Mersni</i>	117
Data-Driven Fault Detection and Identification in Wind Turbines through Performance Assessment. <i>Boudy Bilal, Kondo Hloindo Adjallah, Alexandre Sava</i>	123
Business Models for Wireless AAL Systems – Financing Strategies. <i>Jelena Bleja, Henrike Langer, Uwe Grossmann</i>	130

Research on Short-term Electric Load Forecast Based on Grey Neural Network and Snap-drift Cuckoo Search Algorithm. <i>Feng Chen, Zhiwei Ye, Jun Su, Haofeng Lang, Xiaoxiao Shi, Shuqing Wang</i>	134
Solar Cell Data Acquisition System. <i>Valeriy Martynyuk, Mykola Fedula, Roman Petrus, Denis Makaryshkin, Liudmyla Kovtun</i>	140
An Approach to Intelligent Distributed Scanning and Analytical Processing of the Internet Inappropriate Information. <i>Alexander Branitskiy, Andrey Fedorchenko, Igor Kotenko, Igor Saenko</i>	146
The FPGA-Based Problem-Oriented On-Board Processor. <i>Volodymyr Opanasenko, Alexander Palahin, Stanislav Zavyalov</i>	152
Deep Convolutional Network with Long Short-Term Memory Layers for Dynamic Gesture Recognition. <i>Rostyslav Siriak, Inna Skarga-Bandurova, Yehor Boltov</i>	158
Network Protocols Determination Based on Raw Data Analysis for Security Assesment under Uncertainty. <i>Diana Gaifulina, Andrey Fedorchenko, Igor Kotenko</i>	163
Specialized Computer Systems Digital Bandpass Frequency-Dependent Components Rearrangement. <i>Hnna Ukhina, Valerii Sytnikov, Oleg Streltsov, Pavel Stupen, Dmitrii Yakovlev</i>	168
Computer Tools for Cargo Thefts Fighting on Railway Transport. <i>Ivan Kit, Andrii Fomenko, Volodymyr Vyshnia, Iryna Novosad</i>	172
New Direction for Malware Detection Using System Features. <i>Štefan Balogh, Ján Mojžiš</i>	176
Method of Audio Interaction with Indoor Navigation Systems. <i>Olha Petrova, Galyna Tabunshchyk</i>	184
Low- and High-level Methods for Tree Segmentation. <i>László Czúni, Karim Ben Alaya</i>	189
The universal neural network model for solving the Navier-Stokes equation. <i>Aleksei Lomakin, Nikolai Korsunov</i>	193
A Machine-Learning Based Approach for DataDriven Identification of Heating Dynamics of Buildings' Living-Spaces. <i>Roozbeh Sadeghian Broujeny, Kurosh Madani, Abdennasser Chebira, Veronique Amarger, Laurent Hurtar</i>	197
The Computer-integrated System of Assessment of Plant Condition in Closed-ground Structures. <i>Vitaliy Lysenko, Taras Lendiel, Dmytro Komarchuk, Alla Dudnyk, Natalia Zaets</i>	203
Classification Methods of Machine Learning to Detect DDoS Attacks. <i>Tamara Radivilova, Lyudmyla Kirichenko, Dmytro Ageiev, Vitalii Bulakh</i>	207

Using Clustering Analysis for Determination of Scattering Kernels in X-ray Imaging. <i>Anton Danyk, Serhii Radchenko, Andrii Netreba, Oleksandr Sudakov</i>	211
Intelligent Information System for Investment in Uncertainty. <i>Yuriy Kondratenko, Galyna Kondratenko, Ievgen Sidenko, Mykyta Taranov</i>	216
Neural Controller for Mobile Multipurpose Caterpillar Robot. <i>Oleksandr Gerasin, Oleksiy Kozlov, Galyna Kondratenko, Joachim Rudolph, Yuriy Kondratenko</i>	222
Assessment of Occupancy Estimators for Smart Buildings. <i>Claudia Chitu, Grigore Stamatescu, Iulia Stamatescu, Valentin Sgârciu</i>	228
The Basic Model of Attack Resistance Estimation for Monitoring the Program Code Integrity of the FPGA-Based Systems. <i>Kostiantyn Zashcholkin, Oleksandr Drozd, Oleg Sachenko, Olena Ivanova, Yurii Boliubash</i>	234
A method of the results preparation in addition-based circuits. <i>Oleksandr Drozd, Konrad Grzeszczyk, Nadiia Vasylkiv, Julia Drozd, Iryna Turchenko, Andriy Karachka</i>	239
Evaluation Cognitive Maps for extended technology roadmapping in IoT. <i>Anna Usik, Volodymyr Kazymyr</i>	244
Sharing of Functional and Special Means in Pipeline Floating-Point Systems with Strongly Connected Versions. <i>Oleksandr Drozd, Igor Kovalev, Myroslav Drozd, Oleksandr Martynyuk, Serhii Polozhaenko</i>	249
Augmented Reality in Telemedicine Applications Focus on Remote Training. <i>Mouna Kenoui</i>	254
Awareness Management of Stakeholders During Project Implementation on the Base of the Markov Chain. <i>Olena Verenysh, Olena Sharovara, Mariia Dorosh, Mariia Voitsekhovska, Nataliia Yehorchenkova, Iryna Golyash</i>	259
Lattice Data Analytics: The Poset of Irreducibles and the MacNeille Completion. <i>George Markowsky, Linda Markowsky</i>	263
Identification of Mobile Terminal with Femtocell on Drone for Civil Protection Applications. <i>Roberta Avanzato, Francesco Beritelli, Mario Vaccaro</i>	269
Lattice Data Analytics and an Exploratory Analysis of the Carver2 Dataset. <i>Linda Markowsky, George Markowsky</i>	274
Multi-level Method of Behavioral Online Testing of Distributed Information Systems. <i>Oleksandr Martynyuk, Oleksandr Drozd, Hanna Stepova, Dmitry Martynyuk</i>	279

A Convolutional Neural Networks approach to Audio Classification for Rainfall Estimation. <i>Roberta Avanzato, Francesco Beritelli, Francesco Di Franco, Valerio Puglisi</i>	285
Twosome Modelling based Emotion Recognition in Videos. <i>Salma Kasraoui, Zied Lachiri, Kurosh Madani</i>	290
Comparison of Pixel Correlation Induced by Space-Filling Curves on 2D Image Data. <i>Stéphane Duguay, Steven Pigeon</i>	294
Vector of Diagnostic Features in the Form of Decomposition Coefficients of Statistical Estimates Using a Cyclic Random Process Model of Cardiosignal. <i>Vasyl Martsenyuk, Andriy Sverstiuk, Aleksandra Klos-Witkowska, Andriy Horkunenko, Stanisław Rajba</i>	298
2D-Deep Neural Network and its Online Rapid Learning. <i>Yevgeniy Bodyanskiy, Olena Boiko, Iryna Pliss, Valentyna Volkova</i>	304
Dynamic Changes of the Colour Intensity of Collected Urine as a Basis for a Distant Uroflowmetry. <i>Leonid Godlevsky, Konstantin Shakun, Vasyl Martsenyuk, Tatyana Tatarchuk, Tatyana Stoeva, Tamara Godlevska, Ilya Shakun, Aleksandra Klos-Witkowska</i>	308
On Development of Machine Learning Models with Aim of Medical Differential Diagnostics of the Comorbid States. <i>Vasyl Martsenyuk, Liliya Babinets, Yuliya Dronyak, Olha Paslay, Olga Veselska, Kornel Warwas, Igor Andrushchak, Aleksandra Klos-Witkowska</i>	313
Web Service Interaction Modeling with Colored Petri Nets. <i>Aleksandr Gozhyj, Irina Kalinina, Victor Gozhyj, Victoria Vysotska</i>	319
New Quantum Secret Sharing Protocol Using Entangled Qutrits. <i>Yevhen Vasilii, Igor Limar, Tomasz Gancarczyk, Mikolaj Karpinski</i>	324
Modeling and Simulation of the Services for Vehicle Charging Infrastructure Interaction. <i>Peter Arras, Galyna Tabunshchyk, Vyacheslav Okhmak, Sergiy Korotunov</i>	330
Development of Architectural Realizations of Phototherapy Computer's Systems for Prevention and Treatment. <i>Alexander Trunov, Alexander Belikov</i>	334
Application of Wireless Sensor Networks for Digital Agriculture. <i>Volodymyr Romanov, Igor Galelyuka, Hanna Antonova, Oleksandra Kovyrova, Volodymyr Hrusha, Oleksander Voronenko</i>	340
Mathematical Model of the Compact Inertial Navigation System of the Robot. <i>Alexey Lagunov, Alexey Orlov</i>	345

Human-Machine Interaction in the Remote Control System of Electric Charging Stations Network. <i>Anzhelika Parkhomenko, Hanna Selevych, Stanislav Kijan</i>	351
A Wireless Sensor Network Node Location Method Based on Salp Swarm Algorithm. <i>Xiaoxiao Shi, Jun Su, Zhiwei Ye, Feng Chen, Pengzi Zhang, Fenghao Lang</i>	357
Simulation of Gas Flow for Welding Process Control in the Arctic Environment. <i>Alexey Lagunov, Anton Losunov</i>	362
Abnormal Event Detection in Video Based on SVDD. <i>Xinlu Zong, Lu Zhang, Jiayuan Du, Liu Wei, Qian Huang</i>	368
NN-SANARX Model Based Control of a Water Tank System Using Embedded Microcontroller Arduino. <i>Vjatseslav Skiparev, Juri Belikov, Eduard Petlenkov</i>	372
Research on Network Intrusion Detection Based on Support Vector Machine Optimized with Grasshopper Optimization Algorithm. <i>Zhiwei Ye, Yiheng Sun, Shuang Sun, Sikai Zhan, Han Yu, Quanfeng Yao</i>	378
FPGA Implementation of Internet Key Exchange Based on Chaotic Cryptosystem. <i>Belqassim Bouteghrine, Mohammed Rabiai, Camel Tanougast, Said Sadoudi</i>	384
Image Segmentation Using Fuzzy C-means Optimized by Ant Lion Optimization. <i>Can Jin, Zhiwei Ye, Lingyu Yan, Ye Cao, Aixin Zhang, Lie Ma, Xiang Hu, Jiwei Hu</i>	388
An Improved Lightning Attachment Procedure Optimization Algorithm for Function Optimization. <i>Shuang Sun, Zhiwei Ye, Yiheng Sun, Sikai Zhan, Han Yu, Quanfeng Yao</i>	394
Abstract Model of Eavesdropper and Overview on Attacks in Quantum Cryptography Systems. <i>Zhengbing Hu, Yevhen Vasiliu, Oleksii Smirnov, Viktoriia Sydorenko, Yuliia Polishchuk</i>	399
Botnet Detection Approach for the Distributed Systems. <i>Oleg Savenko, Anatoliy Sachenko, Sergii Lysenko, George Markowsky</i>	406
Development, Validation and Testing of the Bayesian Network of Educational Institutions Financing. <i>Volodymyr Lytvynenko, Nataliia Savina, Mariia Voronenko, Nadia Doroschuk, Saule Smailova, Oleg Boskin, Tatyana Kravchenko</i>	412
Development of the Dynamic Bayesian Network to Evaluate the National Law Enforcement Agencies' Work. <i>Volodymyr Lytvynenko, Nataliia Savina, Mariia Voronenko, Anna Pashnina, Roman Baranenko, Nataliia Krugla, Ivan Lopushynskiyi</i>	418
About Innovation-Investment Designing of Complex Systems by Inductive Technology of System Information-Analytical Research. <i>Volodymyr Osypenko, Irina Lurie, Maryna Yakobchuk, Nataliia Savina, Oleg Boskin, Volodymyr Lytvynenko</i>	424

Application of a Combined Approach for Predicting a Peptide-Protein Binding Affinity Using Regulatory Regression Methods with Advance Reduction of Features. <i>Oleksandr Murzenko, Serge Olszewski, Oleg Boskin, Irina Lurie, Nataliia Savina, Mariia Voronenko, Volodymyr Lytvynenko</i>	431
Algorithms for Calculating the Square Root and Inverse Square Root Based on the Second-Order Householder’s Method. <i>Leonid Moroz, Volodymyr Samoty, Oleh Horyachyy, Ulyana Dzelendzyak</i>	436
Miniaturized Off-Centered Fed Dipole Slot Antenna for Multiband Wireless Applications. <i>Maawia, Rabiai Mohammed, Shahid Khan, Hazrat Ali, Safdar Nawaz Khan Marwat, Muhammad Asim, Camel Tanougast</i>	443
Motion Detection of a Motorcycle Approaching from Behind Using Head and Torso Simulator. <i>Ryuichi Shimoyama, Shunta Ishitsuka</i>	448
EUROPA – A ROS-based Open Platform for Educational Robotics. <i>Georgios Karalekas, Stavros Vologiannidis, John Kalomiros</i>	452

Abstract — The paper describes modification of the ATA (Attack Tree Analysis) technique for assessment of instrumentation and control systems (ICS) dependability (reliability, availability and cyber security) called AvTA (Availability Tree Analysis). The techniques FMEA, FMECA and IMECA applied to carry out preliminary semi-formal and criticality oriented analysis before AvTA based assessment are described. AvTA models combine reliability and cyber security subtrees considering probabilities of ICS recovery in case of hardware (physical) and software (design) failures and attacks on components causing failures. Successful recovery events (SREs) avoid corresponding failures in tree using OR gates if probabilities of SRE for assumed time are more than required. Case for dependability AvTA based assessment (model, availability function and technology of decision-making for choice of component and system parameters) for smart building ICS (Building Automation Systems, BAS) is discussed.

Keywords—availability tree analysis, instrumentation and control system, dependability assessment, building automation system

I. INTRODUCTION. MOTIVATION AND OBJECTIVES

Existed methods and techniques assess different attributes of dependable instrumentation and control systems (ICS) [1,2] and services such as software and hardware reliability, cyber security and availability [3,4].

These methods are based on application of reliability and security block diagrams (xBD) [5,6], fault/failure, attack and event tree analysis (xTA) [7], SW and HW failure modes and effects criticality analysis (xMECA) [8] and Markov's chain based techniques [3,5,9] and their combining [9-11]. Recovery and modification of software, caused by design faults, attacks on vulnerabilities and patcherization processes are reasons of increasing dependability complexity assessment [10].

One of the most complex task of assessment is choice of technique(s) or combining of them considering features and requirements to ICS dependability. FTA and ATA (Fault and Attack Tree Analysis) are the convenient techniques to assess reliability and cyber security [12,13]

of system.

However, these techniques do not take into account recovery process parameters and maintenance strategies which are important issues for complex systems such as IoT based BAS (building automation systems) [13,14].

Besides, next challenge is development of algorithms and technology of decision-making to choice software and hardware components and configuring of ICS, recovery strategies and parameters by optimal way taking into account reliability and dependability requirements and restrictions such as recovery time, patcherization resources and so on [3,6].

Objectives of the paper are the following:

- to suggest modified so called AvTA (Availability Tree Analysis) model and AvTA based dependability assessment technique;
- to illustrate application of AvTA for BAS availability function evaluation;
- to describe procedures of assessment and decision-making of components and system parameters to meet dependability requirements to BAS.

In comparing with previous works [5,8,9] this paper describes modification of tree analysis based technique taking into account a complete set of faults and failures, reliability, security and recoverability issues.

The paper is structured as followed. Next section 2 describes approach for availability tree analysis; section 3 describes one case study for developed AvTA model of BAS. The results of the ICS AvTA modeling and availability (unavailability) function assessment are analyzed in section 4. Section 5 concludes and describes future steps.

II. AVAILABILITY TREE ANALYSIS. AN APPROACH AND MODEL

Failure Modes and Effects (Criticality) Analysis or FMECA [15] is a technique which is used to analyses preliminary risks of critical failures in point of view components, system and environment. If this technique consider issue of diagnostics (detection or undetection of

IEEE Ukraine Section I&M / CI Joint Societies Chapter

The Instrumentation & Measurement / Computational Intelligence Joint Societies Chapter of IEEE Ukraine Section was established on June 7, 2005.

The Chapter currently consists of 24 members from Chernivtsi, Ivano-Frankivsk, Kharkiv, Khmelnytsky, Kyiv, Lviv, Odessa, Ternopil and Zaporizhzhya.

A Chapter is holding IEEE propaganda, and establishing the professional relations between Ukrainian institutions and companies and worldwide partners within Chapter scope, and organizing and running and supporting the IEEE technical meetings, seminars, workshops and conferences. In particular a Chapter held the nine Technical Meetings in 2018. The Chapter is one of Co-organizers of the 10th IEEE International Conference on Intelligent Data Acquisition and Advanced Computing Systems: Technology and Applications (IDAACS 2019).

Address: 3, Peremoga Square, Ternopil, 46020, Ukraine

Chapter's office: a_sachenko@ieee.org

Phone +380 (352) 47-5050 ext. 12-322

Fax +380 (352) 47-5053

IEEE France Section

IEEE France Section was established in 1967 and involves more than 4000 members living in France and Monaco. The France section community is organized in 29 Chapters. The IEEE France Chapter sponsors each year several prominent international conferences. It involves senior and young professional from industry companies, faculty members and students, etc. IEEE France Section supports IDAACS'2019 as a technical co-sponsor.

TERNOPIL NATIONAL ECONOMIC UNIVERSITY

Ternopil National Economic University was established in 1966. Today it is a multidisciplinary educational complex consisting of seven Faculties and seven institutes that train students in nine domains and 21 majors specialties, 67 Departments, and Education and Consulting Centers.

The total number of students studying at the University is about 14,000. The TNEU academic staff includes about 863 employees, 88 of them are Doctors of Sciences, 637 are Doctors of Philosophy, Associate Professors.

Address: 11, Lvivska St., Ternopil, 46020, Ukraine

Rector's office: rektor@tneu.edu.ua

tel./fax +380 (352) 47-5051

**UNIVERSITÉ
DE LORRAINE**

University of Lorraine

Université de Lorraine (UL) is a public institution initiated by merging four universities of Lorraine in France north-eastern recently named the Grand-Est region. Though the University was founded in Lorraine in 1572, the fusion took place in 2012, to instigate a hub of scientific advancement, economic growth, and knowledge transfer. It is a multisite university incorporating 54 facilities, each with their own focus, located throughout the Lorraine region. UL enrolls 60,000 students, 6,900 staff members, 43 teaching departments and 60 research centers, which makes the UL one of the largest universities in the country. UL is the first French university in Erasmus outgoing mobility (with about 870 outgoing and 385 incomings), and welcome close to 10,000 international students. Also, it is worth to specify the multilingual aspect of many curriculums, with a network of privileged and strategic partnerships with a selected number of universities throughout the world. UL positions itself as a multidisciplinary, technological and entrepreneurial university, able to bring comprehensive answers to the economic and societal challenges of the 21st century, with undergraduate, graduate and postdoctoral programs.

UL is also called LUE (Lorraine Université d'Excellence) offers 15 programs promoting scientific excellence and international collaborations with a specific focus on cross-talk between fields and competencies for individual career development. The Lorraine region has been shaped since the 19th century by the mining and metallurgical industries, which fostered the development of education and research in engineering and technology (60 research units, 3,509 publications, and 400 Ph.D. defense each year). UL belongs to the University of the great region in Europe involving the Liège Université, the Université du Luxembourg, the Universität Trier, the Kaiserslautern Technische Universität and the Universität, all located in the cross-border region of Belgium, France, Germany and Luxembourg (close to 7000 PhDs, over 10,000 faculty members and 135,000 students).

ENIM (Ecole Nationale d'Ingénieurs de Metz)

At the heart of a partnership of National Engineering schools (ENI) (a group comprised of ENI Brest, ENI Metz, ENI St Étienne and ENI Tarbes) and the University of Lorraine's INP Collegium, the National Engineering School of Metz is a public university which, since 1962, has been shaping qualified engineers in the fields of mechanical, material and industrial engineering, with teaching based on a pragmatic and practical approach.

The school offers universal and career-orientated courses lasting either three or five years, and which are accredited by the "Commission des Titres d'Ingénieur" (CTI). Its offer a 5-years engineers undergraduate and graduate programs in mechanical engineering, materials science (materials, polymers and processes), industrial manufacturing systems, industrial engineering and production, which are important sectors of research in Lorraine. As a higher-education public institution, ENIM trains more than 900 students each year for industrial systems engineering.

The ENIM programs are tailored to the needs of businesses and to a constantly-changing world, by maintaining strong links with the industrial world and with its international academic partners. The engineers training relies on a strong link with industrial companies, in particular through graduation projects and teaching on state-of-the-art equipment. The school is currently involved in a digital transformation project of its curriculum to meet the requirements of future industries.

Also, ENIM offers international exchange programs to its students, thanks to its many partnerships in America, Europe, Asia and Africa, also including double degree programs. In addition, ENIM has developed a Sino-French Institute of Engineers in Nanjing, China, in partnership with the Nanjing University of Science and Technology (NJUST) since 2015.

LCOMS (Laboratory of Conception Optimisation and Modelling of Systems)

The Laboratory of Design, Optimization and Modelling of Systems (LCOMS) is a new restructuring research project based on three previous laboratories of the 9th Scientific Department DS9: the Laboratory of Human Control and Comportemental Sciences (LASC, Ea3467), the Laboratory of Interfaces, Sensors and Microelectronics (LICM, EA1776) and the Laboratory of Theretical and Applied Computer Science (LITA, EA3097). This research unit is introduced in the context of the Lorraine University (UL) construction and it aims to carry out new pluridisciplinary and original objectives and to play a complementary and innovative role in this new university.

LCOMS is organized in two teams: « Informatics, Decision, Embedded Systems and Reliability » (IDEES), « Cognitive Stimulation, Human-Systems Interaction and Human Machine Interface » (SCAIM). These teams develop a pluridisciplinary research and work on original problems covering the fields of combinatorial optimization, scheduling, transportation, machine human interfaces, assistance to individuals and for communication, communicating systems design, intelligent sensors, data collection and reliability.

The resources include about 80 individuals, 2 research teams, 45 researchers, about thirty Ph.D students and post-doc, some administrative staff and, they profit from several services for supporting the research activities. The laboratory has an excellent scientific production level by publishing about 150 articles in international journals during the last 5 years, and it has a strong participation to high-education programs related to the scientific research and to the professional learning.

Several collaborations exist between the LCOMS teams and other French and foreign universities. These collaborations are concretized by high-level publications, national and international projects and the organization of prestigious international conferences (such as CIE45, ROADEF2017, IEEE/CoDIT14, IEEE/CIE39...). Moreover, we note the outstanding national and international visibility of LCOMS throughout the regular participation to the evaluation organizations, the international program committees and to the international journal editorial boards (such as Computers & Industrial Engineering – Elsevier, RAIRO-Operations Research - Cambridge Journals, IRBM - Elsevier, Eur J Industrial Engineering...). The originality of the pluridisciplinary objectives, the scientific complementarity of the teams, the available human resources and the great motivation are our assets to make a successful scientific project.

sensors

an open access journal by 

MDPI Sensors

Sensors (ISSN 1424-8220; CODEN: SENSC9) is the leading international peer-reviewed open access journal on the science and technology of sensors and biosensors. Sensors is published semi-monthly online by MDPI.

Open Access free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), MEDLINE (PubMed), Ei Compendex, Inspec (IET) and Scopus.

CiteScore (2018 Scopus data): 3.72; ranked 9/123 in 'Physics and Astronomy: Instrumentation' and 102/661 in 'Electrical and Electronic Engineering'.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the first half of 2019).

Recognition of reviewers: reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.

Sections: published in 11 topical sections.

Impact Factor: 3.031 (2018) ; 5-Year Impact Factor: 3.302 (2018)

Fondation ENIM

The ENIM Foundation supports the development of initial training, as well as the fundamental and applied research within the Ecole Nationale des Ingénieurs de Metz (ENIM), to offer the greatest number of students, an excellent education tailored to companies' requirements. Training future engineers requires to constantly adapt to companies' expectations, which looks for innovation and performance, and this is one of the main challenges of ENIM. To develop teachings closer to industry companies and increase the school's attractiveness, the ENIM Foundation was created in 2014, gathering patrons close to the school, individuals and companies, at the alumni initiative.

The Fondation ENIM, therefore, has several missions: to provide access to Enim's training programs to as many people as possible, to develop training courses of high quality, notably by supporting talented teachers and external speakers and to develop the educational infrastructures. In particular, it strives to ensure training adapted to changing technologies and promotes partnerships with industry to provide future graduates with learning by doing. In addition, the foundation supports research initiatives, the school's international openness, as well as any project of general interest lead by engineer students, by providing grants and financial supports to projects.

Metz Métropole is a French metropolis which includes forty-four municipalities in the Moselle department in the Grand-Est region, centered on the Metz city. It is an intercommunal institution which started with the official metropolitan statute granted to the Metz city by law in 2017. This transition to metropolitan status officially took place on January 1, 2018, without prior passing through the urban community status, which strengthens its positioning within the European Union and becomes one of Europe's attractiveness and development hubs.

Metz Métropole has evolved and improved by leading five major recent projects:

- the new district of the Amphitheater: living and exchanges area (the park la Seille) in the city center, Pompidou-Metz center, convention center.
- the Mercy's health and innovation center, in the south-east of the city, beside the district La-Grange-aux-Bois: the new Mercy hospital of Metz-Thionville regional hospital, a maternity house, and an area for health businesses and services.
- the Mettis public transport system involving two high-level service bus lines that started service in October 2013;
- the development and renovation project for the Mont Saint-Quentin district;
- construction of the new Robert-Schuman hospital gathering Metz private hospitals with craft activities on the Lauvallières district including Nouilly and Vantoux, north-east of Metz.

Among Metz Metropole missions one should also notice the following: the economic, social and cultural development and planning, the development of the metropolitan area, the management of local housing policy, Metz city politics, the management of services of collective interest, and the living environment protection and enhancement.

River Publishers

It is the mission of River Publishers to become a leading market player in the publishing and distribution of state-of-the-art, peer-reviewed, English language academic and professional content in specific STM fields; books written by academics and engineers for the institutional and professional markets.

The goal of River Publishers is to:

- ✍ books, proceedings, PhD dissertations;
- ✍ Publish books written by established and up and coming international academics and professionals;
- ✍ Provide service to advisors, in the form of competitive remuneration and the opportunity to develop their personal series;
- ✍ Provide service to authors, in the form of type setting and copy editing, competitive remuneration and international commercial services;
- ✍ Make our content available at competitive prices to the institutional and professional markets;
- ✍ Make our content available in both print and electronic format, in so doing meeting with the needs and desires of the modern-day engineer, researcher and librarian;
- ✍ Support academia in the developing world, libraries and institutions that currently may not be able to afford the content typically published and offered in the STM community. We realize this by way of offering Euro 5,000 of books each year to the World Bank and European Union academic development programs;
- ✍ Be proactive in supporting a healthy and sustainable environment, this by printing all our content

<http://riverpublishers.com>

International Journal of *Computing*

ISSN (Print) 1727-6209
ISSN (Online) 2312-5381

A Journal is indexed by Scopus Elsevier. A goal of the Journal is to publish the novel results in Computing Science and Computer Engineering and Information Technologies within the following topics:

- ✍ Algorithms and Data Structure, Software Tools and Environments;
- ✍ Bio-Informatics;
- ✍ Computational Intelligence;
- ✍ Computer Modeling and Simulation;
- ✍ Cyber and Homeland Security;
- ✍ Data Communications and Networking;
- ✍ Data Mining, Knowledge Bases and Ontology;
- ✍ Digital Signal Processing;
- ✍ Distributed Systems and Remote Control;
- ✍ Education in Computing;
- ✍ Embedded Systems;
- ✍ High Performance Computing, GRIDs, Parallel and Distributed Computing;
- ✍ Human-Computer Interaction;
- ✍ Image Processing and Pattern Recognition;
- ✍ Intelligent Robotics Systems;
- ✍ Internet of Things;
- ✍ IT Project Management;
- ✍ Wireless Systems;
- ✍ Open Special Issue on Green Mobile Computing and IoT Systems. Assessment, Modeling, Assurance;
- ✍ Open Special Issue on Cyber Security and Safety of Embedded Systems and Clouds. Assessment, Modeling, Assurance;
- ✍ Open Special Issue on Advanced Wireless Systems;
- ✍ Open Special Issue on Contemporary Intelligent Systems and Applications;
- ✍ Open Special Issue on Security and Post-Quantum Cryptography.

computing@computingonline.net

Research Institute for Intelligent Computer Systems

The Research Institute for Intelligent Computer Systems (ICS) - www.ics.tneu.edu.ua is under joint supervision of Ternopil National Economic University and the Glushkov Institute of Cybernetics, National Academy of Science.

The ICS counts the 14 Research Groups, in particular Intelligent Distributed Systems, Intelligent Sensor Data Acquisition, Intelligent Robotic Systems, Neural Networks and Parallel Computing, Knowledge Bases and Ontologies, Information Technology and Specialized Computer Systems, Image Processing and Pattern Recognition, Cybernetics of Complex Systems, Wireless Systems and Networks, Project and Program Management based on IT and Knowledge, Information Security, Intelligent Cyber Security and Defense, Metrology of Information Measuring Systems, Simulation and Algorithmization of Complex Technological Processes. During its history, the staff of the ICS has received more than 150 invention certificates of the former USSR and 66 Ukrainian patents. There were published more than 1100 papers and 163 of them in 2018. There were defended 44 DSc and PhD theses, in particular the four in 2018.

The high level of research and development of ICS has been confirmed since 1997 by awarding 20 international grants and projects within the INTAS, CRDF, NSF, NATO, STCU, and FP7 of the European Union, in particular the two in 2018. In these projects, the ICS collaborated with a huge number of world-known universities as well as governmental institutions and private companies. In addition, we are running a huge Erasmus+ project ALIOT entitled Internet of Things: Emerging Curriculum for Industry and Human Applications, which started in 2016 and DAAD project "Eastern Partnerships" which was run in 2017.

The ICS along with a Dept for Information Computer Systems and Control has established in April 2018 the Ukrainian-German Educational and Research Center, thanking to Prof. Juergen Sieck, HTW Berlin.

The ICS holds the IEEE International Conferences on Intelligent Data Acquisition and Advanced Computing Systems (IDAACS), www.idaacs.net every two years since 2001. In particular, the last one took place in Bucharest, Romania, 21-23 September, 2017. Proceedings of the conferences are indexed in Web of Science, EI Compendex and Scopus. Now we are preparing the 10th IEEE International Conference on Intelligent Data Acquisition and Advanced Computing Systems, which will be held in September 18–21, 2019, University of Lorraine, Metz, France.

The ICS has been taking part in organization of International Symposia on Wireless Systems within the IDAACS Conference since 2012. The 5th IEEE International Symposium on Wireless Systems within the IDAACS Conference (IDAACS-SWS'2020) will be held in September, 2020 in Dortmund, Germany.

The staff of the ICS has a good relationships with the IEEE Student Branch at TNEU and the Instrumentation and Measurement / Computational Intelligence Joint Societies Chapter of IEEE Ukraine Section. A Chapter held eight meetings in 2018.

IEEE Ukraine Section was founded in 1991 and counts more than 400 members, consist of 13 technical chapters, 6 student branches (and Young professionals) and WIE Affinity Group. The IEEE Ukraine Section community sponsors many international conferences each year and works actively to improve a cooperation between professionals.
